Portales Rotary Club, No. 1317 Portales, N.M., U.S.A., 88130

Meets Wednesday at 12:15 p.m.

# ROTARYAM

ROTARY INTERNATIONAL PORTALES ROTARY CLUB

FEB. 23, 1905

FEB. 5, 1935

### Four Way Test

Is it the TRUTH?  
Is it FAIR to all concerned?  
Will it build GOODWILL and BETTER FRIENDSHIPS?  
Will it be BENEFICIAL TO ALL concerned?

Don Nickles  
President

ROTARY:  
MAKING A  
DIFFERENCE

Doreen Kelsey  
District Governor

VOL. 29 - No. 29

KARL TERRY- EDITOR

Wednesday, March 21, 2018

### PROGRAM TODAY:

Tommy Heflin will present the program on Flint napping - making arrowheads and spear points using the same techniques the Indians used.

### PROGRAM LAST WEEK:

Veena Parboteeah gave a program on Leadership Portales

### PROGRAM NEXT WEEK:

Charles Anderson will present the program featuring the Rotary 4-Way Test Essay Contest winners.

Don't forget Fifth Friday in downtown Portales, Friday, March 30 from 5-7 p.m., live music, dancers, car exhibits and more.

### PROGRAM SCHEDULE:

- March 21 - Tommy Heflin - Flint napping (making arrowheads and spear points using the same techniques as the Indians)
- March 28 - 4 Way Test Essay Content (Charles Anderson)
- April 4 - Dr. Manual Varela
- April 11 - Samantha Bartl
- April 18 - Glen O'Rear

### ATTENDANCE REPORT

Membership	Attended	Attendance Percentage
24	22	91.67%

### MUD LIST - Did Not Make Up!

DAVIS • PARTIN

### MISSING - - - SECOND CHANCE

DAVIS • PARTIN

### MISSING LAST WEEK

DAVIS • GORMLEY • HILDEBRAND  
PARTIN • RANKIN

IF YOU MAKE UP, THE PORTALES ROTARY CLUB GIVES YOU CREDIT FOR THE MEAL YOU MISSED.  
IF YOU DO NOT MAKE UP, YOU ARE CHARGED FOR THE MEAL YOU MISSED PLUS A \$1.00 FINE.

### Opportunities to Make-Up Rotary

- Hi Plains Rotary Club  
Tuesday - Noon - Clovis Civic Center.
- Melrose Rotary Club  
Monday Evening 7:00 p.m. - Melrose School
- Farwell Rotary Club  
Wednesday - 12 noon (CST) - Farwell, TX Community Center
- Muleshoe Rotary Club  
Tuesday - 12 noon (CST) - Muleshoe Convention Center
- Clovis Noon Day Rotary Club  
Thursday - 12 noon - Clovis Civic Center - Esperanza Room

# 10 Things About the March Equinox

On Tuesday, March 20, 2018, the day and night are of almost equal duration in most time zones in the world. Here are 10 facts about the **March Equinox** you might not know.

## 1. Also Autumnal Equinox

The March equinox is the **vernal (spring) equinox** in the Northern Hemisphere and the **autumnal (fall) equinox** in the Southern Hemisphere.

## 2. First Equinox of the Year

The second equinox, the **September equinox**, takes place on or around **September 22** every year. It's the Southern Hemisphere's spring Equinox and the fall equinox in the Northern Hemisphere.

## 3. Marks the First Day of Spring

In the Northern Hemisphere, astronomers and scientists use the March equinox as the start of spring, which ends on the June solstice, when astronomical summer begins.

For meteorologists, on the other hand, spring in the Northern Hemisphere begins three weeks before the March equinox on March 1 and ends on May 31.

## 4. A Specific Time Point in Time

Many cultures around the world celebrate the whole day as the March equinox. However, in reality, the equinox occurs at a specific moment in time when the Sun crosses the celestial equator, the imaginary line in the sky above Earth's Equator, from south to north.

At this moment, **Earth's axis is tilted** neither away from nor towards the Sun, but is rather perpendicular to the Sun's rays, like the illustration shows.

## 5. The Date of the Equinox Can Vary

Remember when Spring Equinox was celebrated on March 21? Well, remember again, because the last time that happened was in 2007 and the next time it will happen is in 2101!

Contrary to popular wisdom, the March Equinox can take place on March 19, 20 or 21. In the 21st century, the March Equinox has only occurred twice on March 21 – 2003 and 2007. A March 19 equinox will be more frequent during the last decades of the century.

Note: These dates are based on the time of the equinox in UTC. Due to time zone differences, locations ahead of UTC may celebrate the March Equinox a day later, and locations behind UTC may celebrate it a day earlier.

## 6. Equal Day and Night...

Conventional wisdom suggests that on the equinox everybody on Earth gets to experience a day and night of equal lengths – 12 hours of daylight and 12 hours of night time. In fact, the name **equinox** is derived from the Latin words *aequus*, meaning equal, and *nox*, meaning night.

## 7. ...But Not Quite

In reality though, most places on Earth get to see more daylight than night time on the equinoxes. This is because of two reasons: how sunrise and sunset is defined and atmospheric refraction of sunlight.

**Why don't the equinoxes have equal day and night?**

Most locations of Earth, except those on the Equator, do have almost equal day and night twice a year. The dates for this event, which is also known as **equilux**, depend on the location's latitude and can be a few days before or after the equinoxes.

## 8. Not the Only Day to Balance an Egg On Its End

Every year on the Spring Equinox, we hear about how it is the only day of the year when an egg can be perfectly balanced on its end. Many try it and those who fail are told that they didn't try it at the exact time of the equinox. The truth, however, is that there is nothing magical about the equinox or the time it occurs – you can balance an egg perfectly on its end on any other day. Don't believe us? Try it yourself!

## 9. One of Two Days for This Experiment

To do this experiment, you'll need a straight stick or a long wooden ruler, a protractor and a compass.

Find an empty space such as a park or a parking lot where there are few tall buildings, trees or hills to obstruct the Sun. Find your location's **latitude**. Subtract this number from 90. This will be the angle you will affix the stick in the ground.

If you are in the Northern Hemisphere, use your compass to find south and point the stick in that direction. If you're in the Southern Hemisphere, point the stick or the ruler to the north. Using the protractor fix the stick in the ground at the angle you just calculated - remember to point it in the direction opposite to the hemisphere you are on.

Wait till Noon and see the shadow of the stick disappear. At Noon, the stick will have no shadow at all!

You can only do this experiment twice a year - on the March Equinox and the September Equinox.

## 10. Celebrated Around the World

Many cultures around the world hold feasts and celebrate festivals and **holidays to mark the March Equinox**.

## These are projects that the Rotary Club of Portales is currently involved in:

- Chuck Wagon
- Honor Students of the Month
- Portales Christmas Light Project
- Support TEFAP Food Distribution
- Rotary Park
- Support Christian Children's Home
- Support Baptist Children's Home
- "Power Card"
- Send local students to Camp RYLA
- Rotary Youth Exchange
- Adopt-A-Mile on Clovis Highway - 2 times yearly
- Deliver Meals on Wheels - 3 months per year
- Scholarship Fund at ENMU
- Donate children's books to Portales Public Library
- Help with ENMU Homecoming Parade
- Every Rotarian Every Year (\$100/member/year)
- Simplified Grants - \$1.00 for \$1.00 match by District 5520
- Rotary Foundation Matching Grants - \$5,000 to \$150,000
